Mihir Soni

Frontend Developer(React)

Professional Summary

Experienced Frontend Developer proficient in JavaScript and React.js framework. Collaborates with cross-functional teams to develop functional and visually appealing user interfaces. Implements responsive designs for optimal performance. Skilled in RESTful API integration and optimizing web applications for speed and scalability. Strong problem-solving and communication skills with a proactive and self-motivated attitude.

Projects

Envoy Copy [Live Demo Link](#) [Github Repo Link](#)

React

- Developed a web application using *React.js* to replicate the functionalities of the Envoy visitor management system
- Implemented user authentication and authorization using *React Router* and *Firebase*
- Integrated external APIs for features like email notifications and visitor check-ins using *Axios*
- Designed a responsive layout with *HTML* and *CSS* to ensure compatibility across devices and browsers
- Optimized the performance of the application by minimizing bundle sizes and implementing lazy loading
